- Do not work while the engine or engine oil is hot.
- Do not with gasoline, thinner, organic solvents etc.
- We assume no liability whatsoever for any damage, accidents, or other incidents due to careless or intentional acts.

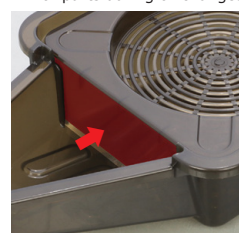

- Ensures the space enough to do oil changes on a scooter with low ground clearance.

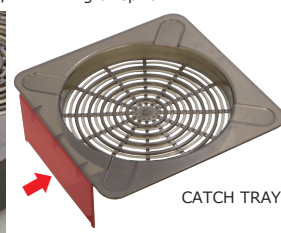

- Drain bolt and washer remain on the removable catch tray to keep them away from the oil pool. Then oil drains into the oil tray. The catch tray also serves as a temporary storage area for parts during oil changes, minimizing oil spills.

- Oil drain port for adjusting the flow rate.

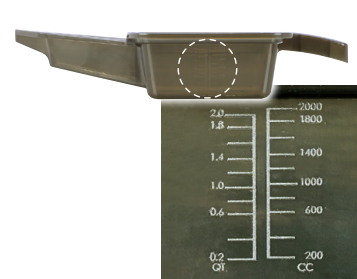

- Helps prevent oil splattering while carrying.

CATCH TRAY

- The handle features a hook hole (φ7.5), allowing hanging by use of an S-hook or similar tool for storage.

- Oil tray has scale markings on the side.
