

THEFT PREVENTION RELATED PARTS

DETERMINATION TO PROTECT INTO THE LOCK !

MATERIAL

Selected material withstanding physical destruction!

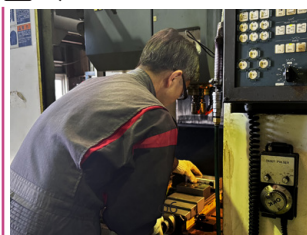

High strength **special alloy steel**

●TDX-01B/03B/06B

The arm and lock shaft section are made of special alloy steel with high hardness, toughness, and corrosion resistance. Realizes resistance against physical destruction.

QUALITY

We give "manufacturing" with attention to detail and reliable quality.

With much Japanese craftsmanship, the product can be used for a long time.

high quality, high accuracy
Made in Japan

TIP SHAFT

Sizes to fit each wheels and prevents the rims from scratch!

The tip shaft is made of special alloy steel, features sponge cover to prevent damage to contact surfaces. K-PAD replacement sponge is also available to address any potential wear or deterioration, peace of mind during long-term use.

K-PAD110

CODE : 880-9010110

PRICE : ¥ 290

JAN CODE : 4990852129850

SIZE / I.D. : φ20

LENGTH : 120mm

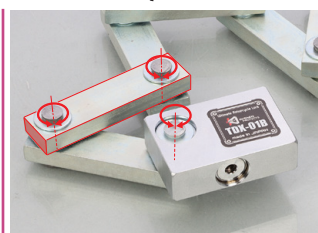

BREAKING STRENGTH

Special alloy steel keeps bolt clipper and hydraulic cutter away, which thefts often use. Also regarding cutting by thunder, arms are made of high durable material, can take a considerable amount of time, produces a loud cutting noise, and requires frequent blade replacement and so on.

ARM JOINT

Flexible and user-friendly arm joint, can be adapted to each sized arm and how to use!

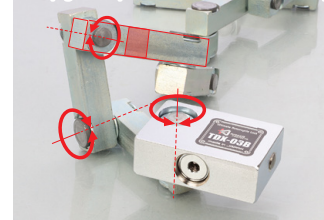

●TDX-01B

Lightweight model. Features flat-bar joint ensuring stable lateral movement and allowing for smooth attachment and detachment. Can fold down compactly for storage.

●TDX-03B/06B

Features multi joint arm. Robot-arm-like flexibility greatly enhances maneuverability.

KEY CYLINDER BLOCK

Strong key cylinder block!

All models featured robust key cylinder block to prevent lock breaking.

●TDX-01B/03B/06B : Special alloy steel with nickel-plated finish

PROTECT COVER

Outer cover with excellent weather resistance and high resistance to abrasion from contact with the ground!

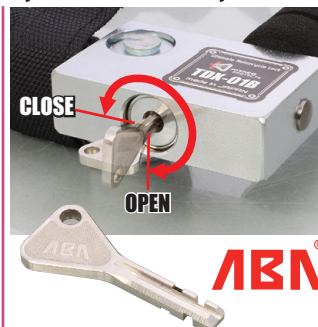

Strength nylon with excellent weather and abrasion resistance.

●TDX-01B/03B/06B

KEY CYLINDER (ABA LOCKS ROTARY DISC CYLINDER)

All models feature one-touch lock! Just insert the shaft with leaving the key off, it locks instantly!

●Commitment to Ease of Use

Designed specifically for motorcycle lock, no key required when locking. One-touch lock, simply inserting the key cylinder block, lock is completed. Greatly enhances convenience.
